The next generation TallyGenicom 6600
family of line matrix printers

the Power
of
+

tg TallyGenicom®

The next generation TallyGenicom 6600 line matrix printers transform product innovations into the Power of Plus. Seamless integration into your current workflow will enable you to reap the benefits from the improved reliability, productivity and environmental advantages.

The 6600 family is available in a choice of printing speeds, including 500, 1000, 1500 and 2000 lines per minute. All models in the 6600 family are ENERGY STAR® qualified and are fully compatible, direct replacements for earlier TallyGenicom printers. The total cost of ownership has been dramatically improved through a 30% reduction in consumable cost per page. Together, these innovations present a compelling reason to upgrade your printing solution to the TallyGenicom 6600 family.

OPEN PEDESTAL

The 6600 Open Pedestal is the dependable workhorse line matrix printer that forms the foundation of the 6600 Series. It is presented in a small footprint with the convenience of either top tear or rear feed and can be accessorized with a front tray and two different rear trays. Like all the printers in the 6600 family, the open pedestal is ENERGY STAR qualified and is ready to plug into your network and start printing from day one.

CABINET

The 6600Q Cabinet is the quiet choice in our mission-critical line matrix printer line-up. It is perfect for those who work in noise sensitive areas and need direct access to a quiet industrial strength printer. This is the top-of-the-line printer in the 6600 family, configured in a fully enclosed sound reduction cabinet with access from the front, top and rear. Innovative options can customize the 6600Q for your printing needs.

ZERO TEAR

The 6600Z Zero Tear is the specialized line matrix printer choice for customers using multi-part and serialized documents that require single form tear-off usability. The 6600Z is the perfect choice to minimize waste of expensive forms such as pre-printed tickets. Through its unique tractor configuration, the 6600Z pushes pre-printed media through the hammer bank, eliminating waste of valuable forms.

QUIET PEDESTAL

The 6600 Quiet Pedestal comes equipped with all the built-in quality, reliability and performance of the top-of-the-line TallyGenicom 6600Q Cabinet printer, in a smaller and more compact footprint. It is the perfect line matrix printer solution for customers looking for a quiet, versatile, dependable, pedestal-style printer for use in an office with space limitations.
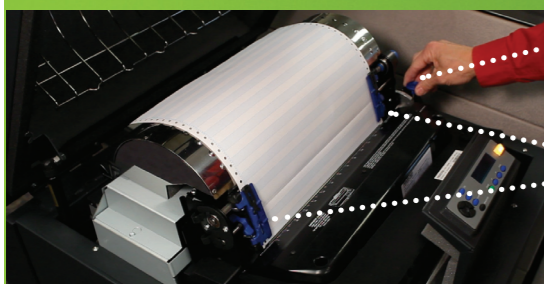

TallyGenicom®

FASTER = Higher productivity. Better workflow. Less waiting for forms and documents to print.

IMPROVED PRINT QUALITY = Easier to read forms, especially in poorly lit environments. A higher impact force improves printing on multi-page forms.

ENERGY STAR QUALIFIED = A newly designed power conservation system provides savings on energy costs and reduces wear and tear on the printer.
LONGER LASTING INK = Fewer ribbon changes yield more productivity and contribute to a lower cost of ownership.

LEADING EDGE RIBBON TECHNOLOGY = Less IT interventions and less downtime, delivered by a patented feature that is only available with genuine TallyGenicom consumables.

EMBEDDED MICROCHIP = Gives you precise, integrated control over ribbon life, print quality and most importantly, operating costs. Boost productivity by preventing interruptions of long print runs.

NEW COMPACT CARTRIDGE DESIGN = A more efficient use of materials contributes to less shipping, packaging and storage costs.

ENVIRONMENTAL ADVANTAGE = Line matrix consumables are inherently greener than serial or laser printer consumables, with a significantly better environmental coefficient achieved by using less cartridges and less shipping materials.

6600 Series INNOVATIONS:

## add up to substantial gains in productivity and environmental responsibility

THE NEW MICRO PLATEN ADJUSTER = Improved print reliability and handling for a wider variety of forms, such as multi-part, heavy, recycled and light stock.

REDESIGNED TRACTOR GATE SYSTEM = Faster paper loading with less waste. The new tractor gate system reduces the number of gates from four to two. This is especially helpful on difficult to print forms.

ALL NEW SHUTTLE DESIGN = With even more reliability and higher performance than earlier models, the shuttle has been entirely re-engineered. This new design (top of photo) requires less service and improves print quality compared to the previous shuttle (shown below new shuttle).

The TallyGenicom 6600 family is built to last for years and years, a key ecological benefit over shorter life cycle products such as laser and serial printers. Engineered with features that promote less energy consumption and generate less waste, the 6600 family of line matrix printers is environmentally responsible and provides the right printing solution for a greener world.

ENERGY STAR

" We needed to do a series of hard resets via the Web Panel and we found that it was generally seamless in the ability to maintain online printing capability."

Jeff Lucas
Yellow Transportation and Roadway

Reliable Connectivity, Seamless Installation and Robust Remote Printer Management

✚ CONTROL YOUR ENTIRE GLOBAL PRINTING NETWORK FROM ANYWHERE = Higher efficiency. Boost your company's productivity with the power of PrintNet Suite™ remote printer management solutions. The PrintNet Suite is a valuable time-saving tool for your mission critical printing network.

✚ PLUG AND PRINT = No down time. Intellifilter™ gives you the widest possible range of emulations, configurability and tools at your disposal. Installation requires no host changes, allows for easy data stream substitutions, and is done without reprogramming. Do you have custom print job files already set up? No problem, Intellifilter works with the files you have already created.

✚ WEB PANEL™ = Never out of touch. Designed for single printer management, Web Panel continues the TallyGenicom tradition of offering you quick remote printer management through any web browser and requires no special installation or configuration.

✚ PRINTNET ENTERPRISE™ = Total control. Your worldwide print operation is at your fingertips with PrintNet Enterprise. By combining a fully integrated Ethernet adapter and Java-based software, remote printer management extends your reach from anywhere you have a computer and connectivity.
- • Configure and monitor printers
- • Be alerted to printer issues from emails, pager or mobile phone alerts
- • Complete compatibility with any TallyGenicom product when equipped with the optional Ethernet card

✚ EXTENDED FORMS SUPPORT = The 6600Q Cabinet can be equipped with extended doors to accommodate larger forms. A single extended door will support a form up to 14" and two doors will allow up to 17".

✚ LOW REAR TRAY = This output tray is ideal for larger print runs. The adjustable back bar keeps the paper aligned and neat.

✚ FRONT TRAY = This tray raises the paper off the floor and allows for easy mobility of paper and printer.

✚ HIGH REAR TRAY = This tray works well for printers that are placed against a wall and output is limited to short runs. It also enables easy access from the front of the printer.

✚ POWER STACKER = Toughest forms can be printed and neatly stacked without interruption. An essential option for full box printing.

✚ FRONT PAPER ACCESS = Load forms and retrieve printed output from the front of the 6600Q cabinet. This option allows you to better utilize office space by placing the printer against a wall.

✚ ACOUSTIC SHROUD = Reduce noise on the 6600 open pedestal with this easy to install option. By reducing the sound emanating from the paper exit, the noise level can be reduced by 4dBA.

" The speed at which we produce 3000 invoices a day is the most critical element to us. I don't expect I'll have any couriers lined up anytime soon, waiting on the new printer."

Kathy MacKinnon
Procurity Inc.

" For me, it has been very easy to transition over to the new printer, especially with the ease of getting the paper out and the simplicity of the tractors. It definitely was a Plug and Print situation – out of the box and up and running in 10 minutes."

Micky Barber
Rawson Inc.
